

COMPSOFT TECHNOLOGIES

AN INTERNSHIP REPORT ON “Website for Storemyresults”

Bachelor of Engineering

In

Computer Science and

Engineering

Submitted by: Kirana (4MT18CS041)

**MANGALORE INSTITUTE OF TECHNOLOGY AND ENGINEERING
2021**

ABOUT THE COMPANY

We are a digital service provider that aims to provide software, designing and marketing solutions to individuals and businesses, we believe that service and quality is the key to success

We provide all kinds of technological and designing solutions from Billing Software to Web Designs or any custom demand that you may have. Experience the service like none other!

Some of our services include:

Development - We develop responsive, functional and super-fast websites.

We keep User Experience in mind while creating websites. A website should load quickly and should be accessible even on a small view-port and slow internet connection.

Mobile Application - We offer a wide range of professional Android, iOS & Hybrid app development services for our global clients, from a start up to a large enterprise.

Design - We offer professional Graphic design, Brochure design & Logo design. We are experts in crafting visual content to convey the right message to the customers.

Consultancy - We are here to provide you with expert advice on your design and development requirement.

Videos - We create a polished professional video that impresses your audience.

OVERVIEW OF THE PROJECT

Project Name: Website for Storemyresults

Team Members: Kirana(4MT18CS041)

Pavithra(1DA19IS404)

Dhanalakshmi M(1DB18EC029)

Engineering Students Nowadays do not have the habit of remembering their marks of the previous semester or the work rating of the last project in the company, this can actually cause a huge problem to students in their final year of Engineer/if switching companies is taking place, in order to solve this, we here at storemyresults.com would love to provide a platform to students/Graduates to store their results of the previous/current semester thereby making it comfortable to access results and marks accessible whenever required, fun fact, Majority of students don't even remember the marks of their current semester and the sophisticated design of result websites make it a little difficult to access the same.

ABOUT OUR WEBSITE

The most important part of making this site is the user experience, which results in specific university websites do not focus on design as functionality outweighs design in these specific websites, which can further ruin the user experience, here the focus lies on functionality and design. The Working Process is pretty simple here we ask students to create an account with us and we tend to store the data that they enter, the data might include USN, NAME and SUBJECT NAMES with their finalized marks, once that is done we keep a submit option wherein the users/Students can submit their responses, the content of the web page at the time of submission should be downloadable in pdf form for their reference, the data of the user should be completely secured and (s)he has to make an account and set their password to access their account at any point in time. This will make it easier for the students to retrieve their results or marks of any subject of any semester anytime.

TOOLS USED

Software Requirements

- Visual Studio Code 2019.
- Google Chrome or Microsoft Edge of latest version.
- Front End: HTML, CSS, JS (optional)
- Linux 7.1 or Windows XP/7/8/10 OS or Mac OS

Hardware Requirements

- Pentium 200-MHz computer with a minimum of 64 MB of RAM (128 MB of RAM recommended).
- Monitor with a refresh rate of at least 40Hz for a smooth GUI experience (optional).

The screenshot displays the phpMyAdmin web interface. The browser address bar shows the URL: `127.0.0.1/phpmyadmin/index.php?route=/table/structure&db=registration&table=table+users`. The interface is divided into a left sidebar with a database tree, a top navigation bar, and a main content area.

Left Sidebar: Shows a tree view of databases and tables. The 'registration' database is selected, and the 'table users' table is highlighted.

Top Navigation Bar: Includes tabs for 'Browse', 'Structure', 'SQL', 'Search', 'Insert', 'Export', 'Import', 'Privileges', 'Operations', 'Tracking', and 'Triggers'. The 'Structure' tab is active.

Main Content Area:

- Table structure:** A table listing the columns of the 'users' table.
- Indexes:** A section showing the primary index for the 'id' column.
- Partitions:** A section indicating that no partitioning is defined for this table.
